EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Thomas Wiseman on 8-26-2004.

The application has been amended as follows:

In claim 1, delete "comprising" and substitute therefor with - - - consisting essentially of - - -.

2. The following is an examiner's statement of reasons for allowance: In amending claim 1 to recite "consisting essentially of", this substitution makes the claim and all dependent claims free of the prior art. The "basic and novel characteristic" of the present invention is a composition of Factor VIIa and fibrinogen to treat hemorrhaging, where the composition does not include any other blood coagulation factors. The term "consisting essentially of" in this claim excludes other blood coagulation factors because their presence would affect the basic and novel characteristic which defines the invention. However, the recitation of "consisting essentially of" does allow for the acceptance of minor contaminants. Minor protein contaminants can be defined in an analogous way to that reported by Burnouf-Radosevich et al. which is 0.13-0.46 mg of protein contaminants per 1000 U of purified Factor XI.
